

Mark your selections on the enclosed form.

Note: Some genera, particularly those of the monocotyledonous plants, are placed in traditional families for convenience purposes and thus do not reflect current understanding of evolutionary relationships.

Deadline

Only orders received on the enclosed form before
May 1, 2006 will be filled.

Veillez indiquer vos demandes sur le bon de
commande ci inclus, qui devra nous parvenir avant
le 1 Mai 2006.

Favor indicar su orden en la forma incluida. Esta
forma debe ser recibida antes del 1 Mayo de 2006.

Bitte notieren Sie auf unserer Liste welche
Samenpäckchen Sie haben möchten. Wir müssen
Ihren Austrag vor dem 1. Mai 2006 hier haben.

THANK YOU

The UBC Friends of the Garden (FOGS) are
sincerely thanked for their assistance in seed
packaging and mailing.

ABOUT THE UBC BOTANICAL GARDEN

The UBC Botanical Garden was established in
1916 and is the oldest University-based
botanical garden in Canada.

It comprises approximately 78 acres, or 31.5
hectares. Major components are Alpine, Asian,
Food, Native and Physic gardens. The Botanical
Garden houses a number of significant plant
groups, such as Acer, Clematis, Cornus,
Epimedium, hardy Eucalyptus, Hebe,
Lardizabalaceae, Lindera, Magnolia,
Rhododendron, Sorbus, Styracaceae, BC native
flora, alpines and Chinese flora. Our mandate
includes providing plants and plant materials for
academic study and research (based primarily on
germplasm of documented wild origin), using
plants to create attractive public displays, and
providing the public with new plants through
partnerships with local horticulture industry.

Index Seminum 2005

The UBC Botanical Garden Index Seminum, or
Seed List, is published biennially. The listed
seeds were collected in 2005 and are offered for
exchange with botanical gardens, arboreta and
other scientific institutions.

Progeny raised from these seeds may not be
used to generate commercial profit unless
benefits are equitably shared with the
countries of wild origin, under the terms and
spirit of the Convention on Biological Diversity.

Please note that beginning in December 2007
the Index will **only** be available on our website.
Email index.seminum@ubc.ca if you would like
to be notified when it is available.
